## We are not closer to a no deal Brexit, says PM May

**P**RIME Minister Theresa-May said yesterday she did not believe that Britain was getting close to a so-called “no deal” Brexit, where the country crashes out of the European Union without an exit agreement. Asked by the head of a parliamentary committee whether she would warn the public about the consequences of a “no deal” Brexit, May answered: “You have based your question on an

assumption that said we were getting closer to a no deal scenario. I don’t believe that is the case. We have put forward a proposal for what the future relationship should be ... and we are in negotiations on the basis of that.” She added that the government would release around 70 “technical notifications to set out what UK citizens and businesses need to do in a no deal scenario” in August and September this year.
