REAL MALLORCA ANNOUNCE POSITIVE CORONAVIRUS CASE

Palma.—Yesterday, Real Mallorca announced that a member of the club's staff has tested positive for coronavirus.

The club has not specified who this is. Tests were carried out on Monday.

These were for first-team players, the coaching staff and the rest of the staff.

The person who is positive is isolating at home "in accordance with La Liga and RCD Mallorca protocols".

The health authorities have been informed.

Return to training will now start at 9am this morning.

"We will work individually until new tests are carried out."

Mallorca are the fourth club over the past 24 hours to report positive cases - Espanyol, Las Palmas and Valencia are the others.

In recent weeks, there have been positive cases at other clubs, e.g. Atlético Madrid, Real Madrid and Seville.

30% of restaurants will close for good...

PALMA. The restaurants association within the CAEB Confederation of Balearic Business Associations is forecasting a 30% permanent closure of Majorca's bars and restaurants because of the Covid-19 crisis.

Yesterday, association representatives met the director-general of employ-

ment, Virginia Abraham, and the director of the Balearic health and safety institute, Rúbén Castro, and called for there to be an extension of the ERTE furlough scheme until the end of December.

Consideration, the association insisted, has to be given to "the subsis-

tence of small business owners in order to maintain the employment of all their workers".

The association raised the issue of contracts for temporary and "fijo discontinuo" workers, something which is causing owners in the hospitality industry to have sleepless nights. "The main-

tenance of employment and the guarantee of employment for the six monthly payments is unsustainable for many small to medium-sized businesses." For this reason, the association argues, bars and restaurants could decide to close for good in September or October.
