## EU recovery funds to boost Spanish growth by 2 percentage points a year, PM says

London.—European Union recovery funds to be transferred to Spain will boost economic growth by two percentage points annually in the coming years, Prime Minister Pedro Sanchez said yesterday.

The government will use the money to finance 110 major investment projects, San-

chez said, including nearly 3.2 billion euros in renewable energy.

Spain is due to receive about 140 billion euros (\$166 billion) from the EU to help it recover from the COVID-19 crisis. About half of the funds will come in the form of grants and the rest will be loans.

# BUY YOUR OWN VACCINE, BALEARIC PRESIDENT TOLD

● The leader of the opposition, Biel Company of the Partido Popular, insisted in parliament yesterday that more vaccines are needed and

proposed that the Balearic government considers buying its own. Competing destinations such as Greece and Italy, Company said, are more

advanced in their vaccination and are transforming their islands into "fortresses for controlling the virus".
